

PFS flow switch is used in Sea Water , Heating Systems, Water Purification Equipment, Welding Equipment, Laser Systems to measure or control the flow rate. The Magnet has no contact with the Flow, and there is no spring.

- ❑Protection Grade IP65
- ❑Set point is 0.4 lpm water
- ❑Media Temperature -20/93 C
- ❑Max Static Pressure 10 Bar
- ❑Metering Substances Gas, Water, Oil (If special substances, please declare)
- ❑Install Position Horizontal or Vertical (not inversion, sensor must be on top)
- ❑Pipe Size DN15, DN20
- ❑Output: 1A(Max) 250VAC/DC 50W(Max)
